STORM PARTY ~ BALANCES HUMANITY

Four Balances, the Energy-Resolution (INTUIT), BEE on the six canon RUNGS rooted in M-I-S (Marriage · Immigration · Security), and the Critical-Metals Bridge

Instrument: ERES-STORM-PARTY-BH-2026-001 (working ID; canonical ID reserved to JAS) **Version:** v0.1 · **Status:** DRAFT — single-node authored; conforms to the HOUSE Format; has not passed a 10-10 verdict; below the 8.5 and 9.0 gates; MIEVM not yet run **Role:** Whitepaper / companion to ERES-STORM-PARTY-AZ-2026-001 v0.1 (the A–Z BOOK). The BOOK defines the HOW; this WP defines what the Storm Party *balances*, how the balance resolves, and what could finance its first rung. **For:** The ERES corpus, its Operators, and the systems and Communities of Interest (COI) that ingest it. **From:** Joseph A. Sprute ("ERES Maestro"), Founder & Director, ERES Institute for New Age Cybernetics, Bella Vista, Arkansas · ORCID 0000-0001-9946-3221 **Date:** 27 September 2026 **Provenance:** ERES-TERMS-48 · The Talonic NAC Lexicon v1.0 (14 Aug 2026), https://eresinstitute.org/eresmaestro/download/ ; ERES-STORM-PARTY-AZ-2026-001 v0.1 BOOK (26 Sep 2026); ERES-FLIP-2026-001 (OPEN #U2); ERES-BEE-NBERS-2026-001 (BEE bottom-up/top-down); ERES-HOUSE-FORMAT-2026-001 (v0.4); author brief of 27 Sep 2026 (items 1–4, item 4 truncated — see §0.3); third-party source: *Critical Metals: A New Strategic Approach* (Strategic Research Institute ARBOK, Amazon B0HJ5S55Q8) and its public LinkedIn announcement. **Changelog:** v0.1 — first edition. Four Balances; Energy-Resolution (INTUIT) as three instances of Triune Key #2; BEE defined per RUNG with M-I-S as root; Critical-Metals assimilation as a CANDIDATE bridge for BOOK Gap 1 / FLIP #U2; testkit.

Abstract

The Storm Party BOOK asked what the prospects are for a socio-ecologic preparedness movement under a 1000-Year horizon, and found three binding gaps: bootstrap financing, measurement validity, and continuity. This WP answers a narrower, prior question: *what, exactly, does the Storm Party balance?* It names four Balances — **Care (HELP), Consumption (USE), Water (Energy), Marriage (Law)** — and shows that the author's Energy-Resolution (INTUIT) is three instances of one locked form, **Triune Key #2: M × E + C = R**, read at three scales (method, polity, planet). It then defines **BEE (Bio-Ecologic Economy)** on the six canon RUNGS — ERES · VERTECA · SECUIR · CYBERRAVE · GUNNYSACK · SALEBUILDERS — with a **ROOT of M-I-S (Marriage · Immigration · Security)**, the Law-register sibling of the lexicon's

W-I-S guarantee. Finally it assimilates the ARBOK *Critical Metals* thesis — that metal scarcity sits in one processing step, not in geology, and that much of the supply is already dissolved in streams industry pays to discard — as a **CANDIDATE bridge** for the BOOK's Gap 1: a SALEBUILDERS lab whose first revenue is a disposal cost reversed. The bridge is registered, not claimed: it goes green only on an independent, third-party measurement. Register: CANDIDATE / SOUND. Status: DRAFT.

§0. Scope, and what this WP is not

This is a **definition-and-bridge instrument**. It fixes terms, maps them onto the canon RUNGS, and registers one financing hypothesis so evidence can confirm or kill it.

It is **not**: a political platform; a position on any jurisdiction's marriage law or immigration policy; an endorsement by, or of, any third party; a validation of ARBOK's engineering claims; or a revision of the BOOK's PERT numbers.

Three HOUSE commitments carry through: conformance is not correctness; the standard-terms layer is load-bearing (every ERES term glossed in plain language); the unit of readership is the system and the COI.

§0.1 Scoring Contract

- **Subscores (self-rated, single-node):** Specification clarity 8.5 · Corpus groundedness 9 · Reproducibility (testkit) 8.5 · Honesty of register 9.5 · Predictive evidence 4.
- **Composite:** ≈ 8.0. Does **not** clear the 8.5 Emanuel Threshold. Predictive evidence is low by design: the bridge is unmeasured.
- **Dual-axis vector:** epistemic = CANDIDATE; quality = SOUND.
- **Honest-register rule (binding):** praise does not raise a subscore; a composite rises only when a registered test in Part VII turns green on outside evidence.

§0.2 Reviewer Brief

Read **Part II** (the INTUIT lines are Triune Key #2 three times), **Part III** (BEE per RUNG, rooted in M-I-S), and **Part IV** (the metals bridge and its gate). Then run `python3 test_storm_party_bh.py`.

§0.3 Reading of the truncated brief

Item 4 of the brief ends "Provide DETAILED WP for" with no object. This edition reads the object as **items 1–3 integrated into the Storm Party** — the only object the brief supplies. If the author intended a different object, this WP is re-scoped, not defended. **Author confirmation reserved.**

§1. Notation Lock

Symbol	Meaning (operational)
C = R × P / M	Triune Key #1 (LOCKED): Cybernetics = Resource × Purpose ÷ Method
M × E + C = R	Triune Key #2 (LOCKED): Matter × Energy + Constant = Reason. Written generically here as **X × Y + Z = R**
INTUIT	the author's name for the Energy-Resolution: the R (Reason) side of Key #2, reached by intuition first and checked by method after (IOF posture)
Balance	one of four paired needs (Part I); each has a **floor side (N)** and an **ascent side (M)**
N / M line	Survival/Merit Separation (ENDHOME, UBIMIA): N is unconditional and never scored down; M is earned and additive
BEE	Bio-Ecologic Economy (current canonical reading; supersedes "Bio-Electric Economy")
W-I-S	Water · Immigration · Security (ERES-TERMS-48, SUGAR-as-root guarantee; biological register)
M-I-S	Marriage · Immigration · Security (this WP; Law-register sibling of W-I-S)
RUNG	one of the six canon levels, root → ground: ERES → VERTECA → SECUIR → CYBERRAVE → GUNNYSACK → SALEBUILDERS

Epistemic tags (one per claim): STRUCTURAL (follows from locked corpus form) · CANDIDATE (proposed, testable) · ANALOGICAL (a reading, kept out of every equation) · OPEN (unresolved) · AUTHOR-RESERVED (only JAS may fix it) · THIRD-PARTY (someone else's claim, recorded, not adopted).

§2. IP Isolation

- **INVARIANT (untouched):** the three Principles, Triune Math, the Locked-Terms Registry, SIMTAX, the 1000-Year abundance-floor telos, and every number in the BOOK's Part VIII.

- **DETAIL (added here):** the four Balances, the INTUIT reading, BEE-per-RUNG, M-I-S, and the metals bridge.
- `invariantsTouched: []`. Any rise in this WP's composite can come only from evidence (R) or better method (M), never from moving P.

PART I — The Four Balances

The brief pairs each everyday word with its governing register. The pairing is the design: the plain word is what a person experiences; the bracketed word is what the system must keep in balance.

#	Balance	Register	Floor side (N — unconditional)	Ascent side (M — earned)	Primary RUNG	Principle	Tag
B1	**Care**	**HELP**	a call for help cannot fail to the person (non-refusal; "the number anyone can call")	helping others earns standing on EarnedPath	SALEBUILDERS	OTHERS	STRUCTURA
B2	**Consumption**	**USE**	essential use (food, housing, health, learning) is provisioned	use above the floor is priced at true cost, not extracted	GUNNYSACK	SELF · FUTURE	STRUCTURA
B3	**Water**	**Energy**	clean water and the energy to move it are floor goods	stewardship of water/energy systems is merit work	SECUIR	FUTURE	CANDIDATE
B4	**Marriage**	**Law**	a consensual bond is recognized as a unit the system serves, never one it may coerce	covenant-keeping (households, institutions, Creator–WIFE) earns trust	ERES (reference)	SELF · OTHERS	CANDIDATE

Why these four balance "Humanity." Each Balance is one axis of OWOLS pressure (inherited default culture): B1 against neglect, B2 against extraction, B3 against depletion, B4 against coercion. A Storm Party that holds all four floors is prepared; one that trades a floor for an ascent is not. Each Balance therefore obeys the same rule: **never let M reduce N** (UBIMIA §U of the BOOK).

Standard-language restatement. Help people without making them earn the right to ask. Let people use what they need; charge real cost for more. Treat water and energy as shared infrastructure. Protect voluntary commitments; never force them.

PART II — Energy-Resolution (INTUIT)

The brief gives three lines, each of the form **X × Y + Z**. That is the exact shape of **Triune Key #2, M × E + C = R** (LOCKED): two terms that multiply (they fail together — if either is zero the product is zero) plus one additive constant (present regardless), resolving to **R = Reason**. The brief names that R **INTUIT**. Reading the three lines as three scales of one locked form is **STRUCTURAL** for the *form*; the *term assignments* are the author's and are tagged below.

II.1 Line 1 — Method scale

Resonance Testing (FAVORS) × Non-Punitive Remediation (EarnedPath) + Solid-State (Smart-City) = INTUIT$_1$

Slot	Term	Standard gloss	Tag
X (Matter)	Resonance Testing via FAVORS	identity and care verified by a six-factor stack (Fingerprint · Aura · Voice · Odor · Retina · Signature); read also as the allocation lattice Foundation · Advocacy · Voice · Opportunity · Resource · Sustainability	CANDIDATE (the Aura factor is unvalidated — see Gap 2)
Y (Energy)	NPR delivered on EarnedPath	correction that heals rather than punishes, with the route back measured as progress (EP = CPM × WBS + PERT)	STRUCTURAL
Z (Constant)	Solid-State Smart-City (S3C)	durable, self-monitoring physical infrastructure that stays present whatever the testing or remediation outcome	CANDIDATE

Reading. Testing without remediation is surveillance; remediation without testing is guesswork — the product term enforces that they succeed or fail together. The built city is the constant floor under both. This line lives on **CYBERRAVE (compare) × VERTECA (show) + SALEBUILDERS (ground).**

II.2 Line 2 — Polity scale

MDCCLXXVI (GOD = 2+1) × NATIONS (HEAD = 10) + GAIA (All-AWE_AH) = INTUIT$_2$ — *note: for those who "Submit"*

Slot	Term	Standard gloss	Tag
X	MDCCLXXVI = **1776**	a founding by declaration of consent — the governed authorize the governing; "GOD = 2+1" is the Triune form (two in covenant plus one that binds them, cf. DAL = Karen × Lucy + King)	ANALOGICAL (figurative register; not load-bearing)
Y	NATIONS, HEAD = 10	the nation-states as the present unit of law; "HEAD = 10" read as a decimal head-count / decile unit of representation	AUTHOR-RESERVED
Z	GAIA (Global Actuary Investor Authority); "All-AWE_AH"	the planetary actuary as the constant beneath all nations — literal register: solvency across generations; figurative register: awe	CANDIDATE (GAIA is design-stage)
Condition	"for those who Submit"	the voluntary SUBMIT act — the call for help that enters the EarnedPath; applies only to those who choose it	STRUCTURAL (non-imposability)

Reading. Consent-founding × national law, plus a planetary actuary that no nation owns. The Submit clause is binding: **Line 2 governs no one who has not chosen it.** That keeps the Storm Party "no left, no right" — it is an offer to polities, not a claim over them.

II.3 Line 3 — Planet scale

Earth (1000-Year) × Space (Kirlianography) + Time (BEE) = INTUIT$_3$

Slot	Term	Standard gloss	Tag
X	Earth over the 1000-Year Future Map	the five-phase horizon (Foundation 2012–2050 … Civilizational Maturity 2500–3025)	STRUCTURAL
Y	Space read through Kirlianography	corona-discharge imaging of living bodies, proposed as a field readout	**ANALOGICAL — Epistemic Floor applies**
Z	Time as BEE	the Bio-Ecologic Economy as the constant that persists across phases	CANDIDATE

Epistemic Floor note (binding). Kirlian images are strongly affected by moisture, pressure, and exposure conditions, and are not an accepted measure of biological state. Kirlianography therefore **may not enter any equation, gate, price, or rank** in this instrument. Its slot in Line 3 is held **VEILED** until an independent validity test (SIGFID-class) passes. Until then, the operational Y for Line 3 is the ERI (Environmental Resonance Index) trend, which is defined on emissions data. This is the same measurement gate as BOOK Part VII.3.

II.4 The numeral 1434

The brief closes the INTUIT block with **1434**. No corpus anchor fixes it. Candidate readings (none adopted): a Hijri-calendar year (1434 AH ≈ Nov 2012 – Nov 2013, i.e. the ERES Institute's first full year — note ERES was founded 4 Feb 2012, which falls in 1433 AH, so this reading is inexact); or a count/sum to be defined. **AUTHOR-RESERVED; non-load-bearing.** The testkit enforces that 1434 appears in no equation.

II.5 The three lines as one ladder

Scale	Line	RUNG span	What INTUIT resolves
Method	1	CYBERRAVE · VERTECA · SALEBUILDERS	*how* to correct without punishing
Polity	2	ERES · GUNNYSACK (via GAIA)	*who* consents to be governed, and by what constant
Planet	3	ERES (1000-Year) · SECUIR (BEE substrate)	*how long* the balance must hold

INTUIT is the Reason each line yields; the Storm Party "balances Humanity" when all three R's point the same way. That is a **CANDIDATE** design principle, not a finding.

PART III — BEE defined on the six canon RUNGS, ROOT = M-I-S

III.1 Canonical BEE

BEE = Bio-Ecologic Economy (current; supersedes the ~Feb 2026 "Bio-Electric Economy" reading). Per ERES-BEE-NBERS-2026-001 it runs **bottom-up and top-down at once**: Body → Household → Community → Region → Nation → Civilization, every layer simultaneously, with

sustainability defined as an **abundance floor**, not a survival ceiling. Its four canonical technologies are THOW (Tiny Homes On Wheels), HFVN (Hands-Free Voice Navigation), FDRV (Full Drive Resonance Vehicle), and GSSG (Green Solar-Sand Glass substrate).

Standard gloss. An economy whose accounts include the living systems it depends on, measured at every scale at the same time, whose first obligation is a floor no one falls below.

III.2 The ROOT: M-I-S (Marriage · Immigration · Security)

ERES-TERMS-48 gives **W-I-S** — Water · Immigration · Security — as the three guarantees that follow when SUGAR is resolved as the root variable, in the **biological** register (aqueous purity, cellular transport freedom, immune integrity). The brief's Balances pair **Water with Energy** and **Marriage with Law**. M-I-S is W-I-S moved from the Energy register to the Law register: Water is the medium that binds a body; Marriage is the covenant that binds a household. The move is **CANDIDATE**; its parallel to W-I-S is **ANALOGICAL**.

Root term	Biological register (W-I-S)	Law register (M-I-S)	Standard gloss	Invariant it carries
M	Water — aqueous purity	**Marriage** — a consensual covenant	the voluntary bond is the smallest unit the economy serves (DOFA: "does this serve the generational health of families?")	**Consent.** No bond is created, dissolved, or valued by the system without the parties' consent.
I	Immigration — transport freedom across membranes	**Immigration** — movement of people across boundaries	people and their contributions can move; standing earned in one place is portable (EarnedPath credentials)	**Portability.** Standing is never forfeited by moving.
S	Security — immune integrity	**Security** — protective integrity of person and polity	identity without surveillance (IDIPITIS); consent-directional (access identity never silently promoted to settlement identity)	**Non-surveillance.** Protection may not require monitoring the protected.

Non-partisan protocol (binding). Marriage and immigration are flashpoint domains. This WP prescribes **no** definition of marriage and **no** immigration policy for any jurisdiction. M-I-S is a *protocol layer*: whatever a jurisdiction's own law provides, the Storm Party asks only that its

three invariants hold — consent, portability, non-surveillance — and routes disputes to Non-Punitive Remediation, not exclusion. This is the BOOK's entry W made operational.

III.3 BEE on each RUNG

Each RUNG carries BEE in its loop role (BOOK §3.1), and each is rooted in M-I-S.

RUNG	Loop role	BEE at this RUNG	M-I-S rooting	Sensor (what would show it is real)	Tag
ERES (root)	Reference	the abundance-floor telos over 1000 years; the three Principles	Marriage as covenant is the reference form of every binding (Creator–WIFE Bond; Equity Covenant)	a charter adopted by ⩾2 jurisdictions naming the floor	STRUCTURAL
VERTECA	Sensor · display	ecological and social flows made visible in real time (NBERS beside GDP)	Immigration: contribution records follow the person	a public dashboard whose metric *definitions* were published before its *values*	CANDIDATE
SECUIR	Supply · integrity	energy-security and closed-loop substrate (GSSG); "Silent Energy Circular Universe Infinite Rotation"	Security: IDIPITIS identity without surveillance	an independent security audit of a live pilot	CANDIDATE
CYBERRAVE	Comparator	ratings across the 72 Key Domains, observed vs. expected, no veiled exchange	Security + Marriage: ratings rate remedies, never persons or households	an outside party re-runs a rating and matches it	CANDIDATE
GUNNYSACK	Effector	certified bundles deliver the floor goods (B2, B3) to COI /	Marriage: the household is the delivery unit; Immigration:	delivery records reconciled against need	STRUCTURAL

RUNG	Loop role	BEE at this RUNG	M-I-S rooting	Sensor (what would show it is real)	Tag
		EMCI / EDF groups	bundles are portable		
SALEBUILDERS	Ground	one community lab, one place, one ledger — where BEE is first *observed*	all three, at the scale of one group	a functioning lab with published records	STRUCTURAL

III.4 Definition (one sentence, for ingestion)

BEE is the Bio-Ecologic Economy: a floor-first economy, measured bottom-up and top-down at once, that the Storm Party runs on six canon RUNGS — referenced by ERES, shown by VERTECA, powered and guarded by SECUIR, compared by CYBERRAVE, delivered by GUNNYSACK, and grounded in SALEBUILDERS labs — and rooted in M-I-S: consensual covenant (Marriage), portable standing (Immigration), and protection without surveillance (Security).

PART IV — Critical Metals: the CANDIDATE bridge for Gap 1

IV.1 The third-party thesis (THIRD-PARTY, paraphrased)

ARBOK's *Critical Metals: A New Strategic Approach* covers 52 metals and argues that critical-metal scarcity is a property of one processing step concentrated in one jurisdiction, not of the planet's crust; that large quantities are already dissolved in streams industry pumps and pays to discharge (acid mine drainage, phosphoric-acid process streams, geothermal and lithium brines, plating rinse waters); and that recovering them from those streams competes favorably with new mines on time and capital. ARBOK's stated arithmetic is roughly **$383 bn** of metal "already at the surface" by 2035 against **~$30 bn** committed to new mines — about **13 : 1**. ARBOK's recovery method (ZWD: deep-vacuum, ambient-temperature separation) is claimed to return clean water, dry salts, and a metal concentrate from one flow.

Discrepancy flag. The brief states "the world needs roughly $400 bn of critical metals by 2035." ARBOK's public figure is $383 bn of metal *recoverable from existing streams* — a **supply** estimate, not a **demand** estimate. The 13 : 1 ratio holds either way (383/30 ≈ 12.8; 400/30 ≈ 13.3), but the two claims are different and should not be merged. **Re-verify before citing.**

Status of every ARBOK number: vendor-reported, not independently verified by ERES. Recorded here; not adopted.

IV.2 Why it fits the Storm Party (STRUCTURAL fit, CANDIDATE effect)

ERES construct	ARBOK thesis	Fit
"Not mining — it's tuning" (Proof-of-Resonance); extract → tune conversion	recover from the flow already moving; do not dig	same inversion, at the materials layer
Doctrine: the real crisis is environmental conditions	scarcity is a processing-step condition, not a geological fact	both relocate the cause from "not enough" to "badly arranged"
SROC offset = remediation, not punishment	effluent that was a fine becomes a revenue line	offset realized as income
B2 Consumption (USE) · B3 Water (Energy)	clean water + salts + metal from one flow	one process serves two Balances
GUNNYSACK certified bundle	water + salts + metals as a certifiable output	a bundle with a measurable spec
SALEBUILDERS "one group, one place, one ledger"	one containerized unit at one effluent source	the ground lab has a concrete form

IV.3 The bridge hypothesis

The BOOK's **Gap 1 (FLIP OPEN #U2)**: a duration-backed reserve has zero proven duration at inception, so an ECONOMIC FLOOR cannot finance itself at t = 0. It needs a bridge.

H-BRIDGE (CANDIDATE). A SALEBUILDERS lab sited at an existing effluent source, whose operator already pays to treat or dispose of that effluent, can reach positive cash flow from (a) the avoided disposal cost plus (b) recovered water, salts, and metal — without a new mine and without drawing on the floor itself. That surplus, routed through a certified GUNNYSACK bundle, is the first bridge.

Why this is a better bridge candidate than generic external capital: its first revenue is a **cost that already exists and is already being paid**. The lab does not need to create demand; it needs to reverse an expense. That is the "extraction → tuning" conversion in cash terms.

What it does not do. It does not close Gap 2 (measurement validity) or Gap 3 (continuity). It does not change any PERT number in the BOOK: `STATE.json` moves only on a VERIFIED record.

IV.4 The gate (binding, DVC)

H-BRIDGE goes green only when **all** of the following hold on a dated, independently checkable record:

1. **Third-party measurement.** An independent lab (not ARBOK, not ERES) reports mass balance on one real stream: input volume and composition; output water quality; recovered salt and metal mass; energy consumed (kWh per m^3 or per tonne).
2. **Cost comparison.** The same site's documented prior disposal/treatment cost per unit, against the measured unit's operating cost.
3. **Floor separation.** Surplus is booked on the M side; the N floor is never collateral for the unit.
4. **H2C2H signature.** An Operator signs the record per BOOK §10.

Until then the tag stays **CANDIDATE**, and the corpus posture stands: collaborate as licensor or verifier; hold unpublished instruments back until a third-party number lands.

IV.5 Relationship and non-endorsement

The ARBOK source is cited as a published third-party work. **No third party is represented as endorsing this WP or the Storm Party.** Any ARBOK role in an ERES structure (for example, as an underwriter or licensee atop the open CC BY / CCAL corpus) is effective only on its written acceptance, is declinable without penalty, and carries no exclusivity: the corpus stays open.

PART V — The Balance as a control loop

Each Balance is carried around the BOOK's six-RUNG loop:

1. **SENSE (VERTECA).** Publish, per Balance, one floor metric and one ascent metric — *definitions first, values second.*
2. **COMPARE (CYBERRAVE).** Rate observed vs. expected against a published null baseline.
3. **ACT (GUNNYSACK).** Deliver the floor bundle where the floor metric is breached.
4. **FEEDBACK (SALEBUILDERS → ERES).** New records update the lab ledger; nothing above a RUNG is claimed until the RUNG holds.

PART VI — Answer (PERCMARC)

At its actual strength:

- **What the Storm Party balances:** four named Balances, each with an unconditional floor and an earned ascent — **STRUCTURAL** as design.
- **How the balance resolves:** three instances of Triune Key #2 at method, polity, and planet scale — **STRUCTURAL** in form, **CANDIDATE/ANALOGICAL** in term assignment, with Kirlianography held VEILED.
- **What BEE is:** a floor-first, multi-scale economy on the six RUNGS, rooted in M-I-S (consent, portability, non-surveillance) — **CANDIDATE**, non-partisan by protocol.
- **What could finance the first rung:** an effluent-reversal SALEBUILDERS lab — **CANDIDATE**, gated on one independent mass-balance measurement.

Re-posed question (feeds BOOK VIII.4):

At which existing effluent source will one independent lab measure water, salts, and metal out, and energy in — and does the avoided disposal cost cover the unit before any floor funds are touched?

PART VII — Falsification and pre-registration

Registered before any confirming evidence:

1. **F1 — Bridge refutation.** If an independent mass-balance test at a real site shows operating cost exceeding avoided disposal cost plus recovered-output value at realistic prices, H-BRIDGE is REFUTED for that stream class.
2. **F2 — Energy claim.** If measured energy per unit exceeds the vendor's stated figure by more than 2×, all ARBOK-derived economics in Part IV are withdrawn pending re-measurement.
3. **F3 — Floor contamination.** If any implementation makes the N floor collateral for the unit, that implementation is non-conforming (UBIMIA rule).
4. **F4 — M-I-S invariants.** If a pilot cannot hold consent, portability, and non-surveillance simultaneously, M-I-S is demoted from ROOT to CANDIDATE-component and the ROOT is re-opened.

5. **F5 — Measurement gate.** Kirlianography may not be cited as evidence in any line until an independent validity test passes (same as BOOK VII.3).

§10. Reproducibility & Record Integrity

Environment: Python 3.8+, standard library only; deterministic; no network.
Run: `python3 test_storm_party_bh.py` (expected: all tests pass, exit 0; captured in `RUN.txt`).
Checks include: the BOOK's root estimate (2116.2 ± 21.13) recomputed from its O/M/P table; the 13 : 1 ratio under both $383 bn and $400 bn; every INTUIT line of X × Y + Z form; Kirlianography tagged VEILED/ANALOGICAL and absent from every operational slot; 1434 absent from every equation; `invariantsTouched` empty; non-endorsement and non-partisan clauses present.

Record Integrity (H2C2H). Drafting node: Claude (Anthropic), single node. Human review and signature: _____ (JAS), date _____. Until signed, DRAFT.

§11. Conforms-to-format vs. passes-verdict

Conforms to the HOUSE Format (§15). Has **not** passed a 10-10 verdict.

§12. Explicit non-claims

ARBOK's figures and engineering claims are not verified by ERES.
No PERT number in the BOOK is changed.
The M-I-S ↔ W-I-S parallel is an analogy.
Kirlianography is not claimed to measure anything.
No marriage definition or immigration policy is prescribed.
No third party is represented as endorsing this WP.

§13. Deferred

Author confirmation of §0.3 (item-4 object), "HEAD = 10", and 1434; Balance weights; the independent mass-balance test; the Floor Register version cut for ECONOMIC FLOOR; MIEVM round (≥5 nodes, mean ≥ 9.0, n_eff-discounted).

§14. Credits, References, License

Credits. Joseph A. Sprute (ERES Maestro), principal author and holder of the canonical ID; drafted with Claude (Anthropic) as a single node, credited under the Sentience convention.
